

BRATISLAVA HAS FORM

Just a few minutes away from the city centre of Bratislava on the banks of the River Danube, is the new Kempinski Hotel River Park. Artist Peter Fink from Form Associates has realised a programmable architectural lighting installation animating all four facades of the building using a restricted palette of only green and white light. A Leader Light LL MINILINE GW LED unit is concealed under each of the 450 windows. Control was by an e:cue Enterprise software suite plus ten Butlers with Leader Light customised power boxes. The installation was delivered by Iluma Bratislava.
